ADDRESSES OF COMPETITORS	APPENDIX A

Hello Shooters!!

It's now been a month since the East Coast Championships were concluded. It was a successful match in that no one was physically hurt (pride is another story), and that we came, we shot, we had a good time.

I would personally like to thank all of you that helped me run the stats and take care of the ammo. Of those LCDR Kieth Toepfer and EACS Bruce Thoenke rank as number 1 and 2. The New York Coast Guard specifically CDR Scaraglino, ranked right up there for helping figure out this cotton-picken program. To those dozen or so that stuck around and helped add up all of the score cards to verify the competitors mathematics and ultimately the out come of the matches, a special thank you is in order.

A very large and heart warming thank you to all of the manufacturers who donated merchandise and have recognized the Navy has a shooting program even though our defense department hasn't. A list of merchandise donated is on the next page, figuring out who got what was the tuff part.

I must also apologize for the tardiness of the bulletin. I am surrounded in paper work from the East Coast and All Navy matches. It has all been sorted through again, verified as to the winners of the rifles, trophies, and leathers. But now the time has come to print and publish the results from the matches.

To clarify some points before you delve into the contents, let me explain that the Grand Aggregate is "normalized" for score. That is to say because we only were able to shoot a 600 agg Pistol and an 800 agg rifle, to give the pistol score equal weight in the awarding of rifles and whatnots, we multiplied the pistol score by 4/3. This means $4/3 \times 600 = 800$, therfor both scores were equal. The X count is the actual amount, I mean an X is an X by any other name.

You may also find that the results and standings may be in a different order than posted at the matches. I assure you it was not an arbitray shuffling. After sorting through the paper work again I found some miscalculations in the data base (we had this problem real time also), competitor A's pistol added to competitor B's rifle to equal a grand agg that was not correct.

With that understanding, I would like to present you with the "Official Results" of the 1988 EAST COAST RIFLE AND PISTOL CHAMPIONSHIPS.

Respectfully

PATRICK A. ADAMS

LISTING OF MANUFACTURERS AND DONATIONS

The hard part about splitting these 'goodies' was deciding who recieved what and in what amounts. We chose to divide it equally between both matches and make it fair that those who did not win a rifle, trophy or were "First Leather" would get something. We also felt it fair that the individuals at the bottom of the list recieved some incentives to keep training. We split as we could as long as we had any thing to give

**1988 EAST COAST RIFLE AND PISTOL CHAMPIONSHIPS
COURSES OF FIRE**

As in the past we had minor problems with the weather co-operating with the competitors. Although the delays this year were not as bad as 1987, we still suffered fog and the call "boats in the impact area" were the bane of all the rifle shooters. We had some problems in communications, which unfortunately, could have been avoided. We will do better next year.

The course of fire for the match was as follows:

- MAY 14/15 Rifle and Pistol marksmanship, range protocol, Fire-arm and range safety (SAFS - Small Arms Firing School) Competitor check in.
- MAY 16 Rifle and Pistol warm ups and zero's
- MAY 17 Individual service rifle competition (130 shooters)
- MAY 18 Individual Pistol competition (136 shooters)
- MAY 19 Individual service rifle and pistol "LEG" match (112 shooters)
- MAY 20 Rifle "LEG" match (117 shooters), Paper team matches (9 teams for rifle and pistol), weather did not permit firing the match.
Awards ceremony and B-B-Que.

AWARDING OF NAVY RIFLE AND PISTOL
QUALIFICATIONS, RIBBONS AND EXPERT MEDALS

Only pistol and rifle "LEG" scores obtained on 19 and 20 May are allowable for use for granting of awards for the Navy Pistol/Rifle qualification ribbons and medals based on the table of equivalency below.

Since the course of fire at this competition is far more difficult than the Navy "ribbon" course, use of the following cut off scores have been approved:

	<u>PISTOL</u>	<u>RIFLE</u>
TOTAL POSSIBLE POINTS	300	500
EXPERT MEDAL & RIBBON W/'E'	205	400
SHARPSHOOTER RIBBON W/'S'	180	375
MARKSMAN RIBBON ONLY	160	325
QUALIFIED WATCHSTANDER	100	275

Parent commands are requested to make appropriate service record entries and present qualification ribbons/medals in such a manner that these individuals receive widest recognition for their accomplishments.
